

# DESIGNED TO WORK

Combine flair and function to transform a quiet corner of your home into a stylish and efficient live/work space.

Whether you work from home or just want a dedicated spot to pay bills and stay organized, the home office has a big job to do. It needs to be inviting and practical yet still have a sense of your design personality to be in harmony with the rest of the house. To make it as productive as possible, consider adding relaxed seating and a coffee table, because there will be times you won't want to work at a desk. And just because it's a workspace doesn't mean you can't have a little fun. Bring in colour and design elements through the lighting and accessories — and look for a desk chair that is both comfortable and contemporary.
